

Plastic film

Plastic films in all formats and strengths, 8 – 100 μ

The high productivity levels of our modern machinery coupled with efficient production planning ensure short machining times. Thanks to the latest technology in extruder, packaging and printing machinery, we can produce superior quality products tailored to the customer's specific requirements. By using optimised production processes we can produce film with a strength of anywhere between 8 and 100 μ .

endless film

- tubular film
- open on one side
- flat film
- side-folded film

tear-off film

- with straight welding
- with slanted welding
- with optional tear-off corner
- bags on a roll

various options for endless film and tear-off film

- UV-resistant
- non-slip
- antistatic
- needled
- with butterfly stamp
- customised print (up to 2 colours)

various bags

- individual sizes and film thicknesses
- duffle bags with hole opening in shaped or straight cut
- flat and side-folded bags e.g. for bedclothes, pullovers and ties
- bags with hinged cover, with and without adhesive closure
